For Immediate Release:

**InfoTronics, Inc. Establishes Alliance with DataTeam Systems, Inc.:
*Schools, Government Agencies Benefit from Complete Human Capital Management
Solution***

April 6, 2005 Farmington Hills, Michigan InfoTronics, Inc., a leading developer of web-enabled time and attendance software systems, announces that DataTeam Systems, Inc. (Lawrence, KS) is a certified reseller of InfoTronics employee attendance systems. DataTeam is a full service provider of financial and administrative solutions to schools, governments and not-for-profit organizations.

The alliance addresses the specific need for schools and not-for-profit organizations to share common employee information between payroll and HR departments. Integrating the time and attendance function with human resource and payroll processing lets organizations reduce duplication, improve accuracy of data, and streamline processes for reduced costs.

Attendance Enterprise from InfoTronics automates the manual, error-prone processes that typically burden non-profits — taking the cost out of tracking employee time and attendance data. Attendance Enterprise gives educators and government agencies web-based time and attendance features with useful functionality such as full compliance with the Fair Labor Standards Act and support for multiple job positions.

Notes Larry Burgess, Strategic Alliance Manager, InfoTronics, Inc, “This alliance lets us meet the educational and non-profit sector’s entire business needs – starting at the time and attendance data collection process with InfoTronics’ industry-leading solutions, complimented by complete integration with DataTeam’s financial and administrative systems.”

Roger Haack, President & CEO of DataTeam, commented, “Over the last few months we have seen an increase in the number of requests for a time and attendance solution. After careful research we arrived at the conclusion the InfoTronics provides the best solution for the sectors that we serve. School districts, municipalities and other non-profits are faced with a critical challenge: the need to maximize operational efficiency in order to counter the effects of severe budget cutbacks. This partnership with InfoTronics lets these agencies obtain best of breed payroll, HR, attendance products and services combined into one integrated approach.”

About DataTeam Systems, Inc. DataTeam is a privately held company that specializes in the development, sales, and support of financial administrative solutions since 1979. DataTeam focuses on providing these solutions for publicly funded institutions and not-for-profits, primarily K-12 school districts and educational cooperatives. DataTeam sells and supports financial and administrative systems in 43 states. www.datateam.com

About InfoTronics, Inc. For over 25 years, InfoTronics, Inc. (Farmington Hills, MI) has maintained a singular vision -- to provide businesses of all sizes cost-effective, easily deployed time and attendance solutions. The company’s flagship product, Attendance Enterprise™, provides advanced features for managing labor data — calculating pay rules, scheduling employees, budgeting labor, automating benefit accrual, tracking attendance-based merit points— while meeting the scalability, reliability and security requirements of large organizations. The company’s web-enabled products provide flexibility and universal access for employees. An extensive North American dealer network has helped more than 15,000 organizations use InfoTronics products to reduce labor expenses and improve decision making. www.infotronics.com
