---

## **Recommended Hardware Specifications**

Virtual PC will run on the Minimum Hardware Specifications, but users may not be satisfied with its performance. DataTeam recommends the following specifications for successful operation.

- Virtual PC Version 5.0 that includes the Windows XP Professional hard drive image
- 512MB Minimum Physical Ram
- 500 to 700 MHz Processing Speed

---

---

## **Printers**

- Printing to a dot matrix printer is not supported with Virtual PC. You must print to a Laser Printer.
