

What's New in LX 1.5 for Windows

New features

- **Benefit verification:** There are now functions on the Application menu that make the benefit verification process easier. These functions enable you to:
 - select the sample of families to receive the verification survey
 - print verification survey letters
 - record the results of the survey
 - print letters to notify families of changed benefit status
 - create a summary of the survey results
- **Verification reports**
 - Verification Selection List
 - Verification Summary
 - Verification Survey Letters
- **Accu-Claim Detail report:** This report lists everyone who bought meals and the type of meals purchased.
- **Import Wizard Log report:** This report shows all the information added or changed during the import.
