Lunch Express®

Serving Up a Better Lunch

Bring Your Organization into the 21st Century with this State-of-art Point-of-Sale Reporting & Accounting Systems

...And the kids will thank you for it!

Lunch Express is a state-of-the-art point-of-sale reporting and accounting system with a full graphical interface. Lunch Express was designed from the ground up to quickly process your students, staff, and guests through the lunch, breakfast, or special milk lines in an easy-to-learn and easy-to-operate system. Lunch Express consists of three modules: Cafeteria Manager, Cafeteria Line, & optional Cafeteria Manager Workstation.

Thanks to Lunch Express, I'm through the cafeteria line quicker and onto recess!

Cafeteria Manager

In this module you build the family and student database. The system handles free and reduced applications and the establishment of benefit types. You set prices for reimbursable meals and a la carte items under as many pricing options as you would like. A few easy steps and your management system is ready to start tracking meal transactions and do all the reporting necessary for the Federal child nutrition programs.

Cafeteria Line

In this module you quickly charge for meals purchased. Free and reduced meals are kept confidential even while the computer system is deducting the correct amount from their family account balance. The system will give notice of negative or nearing zero balance. Multiple meals are allowed but even if they go through different lunch lines, only one meal will be reimbursable and the correct charge will be made to the student account.

Cafeteria Manager Workstation

This is an optional module available to do Cafeteria Manager data entry on more than one workstation. It has all the functionality of the Cafeteria Manager module except creating a new database of families and students.

Flexible to Meet Your Needs

The Lunch Express software is designed to run on industry standard PC computers. We don't lock you into expensive proprietary hardware.

Save Time Everyday

This powerful system is designed to automatically combine all the activity from each school, so you don't waste time with manual computation.

Your Choice of Hardware

You can choose from any of our hardware to make your point-of-sale quicker and easier, or enter information manually.

- Laser Scan Guns & Wands
- Numeric & Function Keypads
- Touchscreens, and more!
